- ✓ Easy assembly:

Lay the plastic strip in the sun to increase flexibility. Place strip on a firm surface & evenly space the screws from top to bottom, 25mm (approx) from the end, top & bottom edges. Hammer the screws lightly to make a 'start' in the plastic, then use a screwdriver to screw all the way through the strip. Partially rewind the screws. Form the plastic strip into a circle, overlapping the edges about 6cm. Hold the two layers firmly together & screw through both layers. Reverse the screws slightly so they are not protruding. Place garden bed onto level, cleared position. Fill with soil & plants.
