

# FIXING SUGGESTIONS

## Installation Instructions

**Important:** All plastics expand and contract with temperature changes. To ensure a secure and long-lasting installation, it's essential to distribute pressure evenly across the surface mounting points.

### Recommended Fixing Method:

- Use a **TEK screw and washer combination** suitable for fixing into steel.
- Ensure the washer provides **maximum contact area** to evenly spread pressure and prevent damage to the Polysheet.
- Position each screw at least **20–25 mm from the edge** of the Polysheet to avoid cracking.

### Note:

For convenience, suitable screws and washers can be sourced from **Scrooz**, who offer excellent service and competitive pricing. *(We have no affiliation with Scrooz.)*
